# Economic Indicators

## Summary

The Annual Trends report summarizes and illustrates the characteristics of the Cheyenne and Laramie County economy over the last ten years or longer. This report presents the latest available federal, state, and local agency statistics on Laramie County's economic and demographic growth patterns. Both business and government planning require a realistic and unbiased assessment of past trends and future directions. The indicators and statistics presented in this report are intended to be used as a guide to understanding the local economy.

## 2024 in Review

At this time last year, Wyoming and Laramie County were dealing with high inflation. In 2024, inflation started coming down, largely driven by higher interest rates. The high interest rates have cooled off several sectors, including housing and banking.

A key indicator of the level of general business activity is sales and in Laramie County both total taxable sales and total retail sales decreased in 2024. Total taxable sales decreased 3.1 percent from 2023 to 2024. Total retail sales fell by 1.4 percent during this same time period. This resulted in a decrease in sales and use tax receipts of 3.1 percent from 2023 to 2024. The tax receipts remain at a high level, being second only to the highest level which was recorded in Laramie County in 2023.

There was an uptick in oil activity in the county over the last year. From 2023 to 2024, total annual oil production rose by 19.3 percent, the average monthly number of active wells rose 13.3 percent. The number of spuds – defined as a newly drilled oil well – fell dramatically from 56 to 6. Oil prices fell by \$1.09/barrel on average during 2024.

Laramie County data was mixed on employment from 2023 to 2024, according to both the Local Area Unemployment Statistics (LAUS) and Current Employment Statistics (CES)<sup>1</sup>. Laramie County lost 959 jobs according to the LAUS and but according to the CES Laramie County increased employment by 992. Employment data from the Bureau of Economic Analysis (BEA) lag one year, but provide greater detail of employment and earnings by industry. These data show government remained the primary employer in Laramie County in 2024, accounting for 21.7 percent of all jobs and 36.7 percent of all earnings by place of work. This significant public sector employment continued to serve as an important source of local economic stability.

Unemployment increased in Laramie County and across Wyoming. In Laramie County, it increased from 3.1 percent in 2023 to 3.3 percent in 2024. In Wyoming, it increased from 3.1 percent in 2023 to 3.2 percent in 2024. The annual unemployment rate remains quite low and the last three years have had the lowest rates since 1985 when we began tracking the statistic.

<sup>1</sup>It is important to keep in mind the difference between the LAUS data and the CES data. LAUS data are based on a survey of households and CES data are based on a survey of employers. The LAUS data indicated that more Laramie County residents were working. The CES data reflect a count of **jobs** not workers and showed an increase in the number of jobs in the county.

The housing market cooled down last year due to increasing borrowing rates. The average number of houses for sale in the city fell (-1.6%) as well as in the county (-30.9%). However, the total number of units sold – city and county – increased from 1,264 in 2023 to 1,400 in 2024 (+10.8%). In the city, the average selling price rose from \$372,305 to \$380,513 (+2.2%). In the county, the average selling price increase from \$575,456 to \$603,382 (+4.9%).

The number of building permits issued is an indicator of future home construction. In the city, the number of building permits for new single-family homes increased sharply from 67 in 2023 to 156 in 2024 (+132%), but new apartments/duplexes decreased from 73 in 2023 to 32 in 2024 (-56%). The increase in housing projects led to 181 housing units being added to Cheyenne. That shows a slight rebound from the 30 year low of 141 units that were added last year. In the county, outside the city of Cheyenne, the number of single-family building permits also increased sharply – from 85 in 2023 to 157 in 2024 (+84.7%).

The value of new industrial/commercial construction rose in the city and in the county in 2024. Total new dollar valuation was \$1,637,411,670 in the city and \$90,859,922 in the county.

Laramie County's population increased 0.3 percent in 2023 (+261 people), while the city of Cheyenne saw its population go up 0.9 percent (+558 people). This generally reflects increasing housing and apartment options within the city of Cheyenne.

Looking to the future, with inflation falling in the last year, the most pressing economic issues revolves around housing and the economy. Housing prices have continued to increase over the last several years. Persistently high interest rates also weigh on housing markets as well as economic growth and diversification. In addition, the economy is starting to show some cracks nationally as well as here in Laramie County with unemployment numbers creeping upward and reductions in retail sales and lodging taxes.

The following six sections of the Annual Economic Trends report provide comprehensive data on business, employment, wages and income, demographics, housing and development trends for Greater Cheyenne.

# Business Trends

The Business Trends section contains primary business data sets designed to measure overall economic performance in the Greater Cheyenne economy.

- Table 1.4 contains ten primary growth measures including: population, jobs, personal income and Gross Domestic Product (GDP). The Current Employment Statistics (CES) five-year average job growth rate is 0.55 percent, and the Bureau of Economic Analysis (BEA) employment five-year average growth rate is 1.91 percent. Due to the coronavirus pandemic, these five-year averages were pushed down and are not necessarily reflective of normal economic conditions.

- Figure 3 shows the relationship between growth rates in real GDP, personal income and wages in Laramie County. Real GDP is the inflation adjusted value of all the final goods and services produced in the economy in a year. Over time the growth rates in real GDP, personal income, and wages tend to move in the same direction. In 2023, we saw wages, personal income, and real GDP growth rates increase sizably from 2022.

- Table 1.1 provides total estimated taxable sales and retail sales. Total taxable sales decreased 3.1 percent from 2023 to 2024. Total retail sales decreased 1.4 percent during this same time. 7 of the 14 major sectors saw an increase in sales, despite inflation reaching every sector. Building Materials and Garden Stores saw the largest increase in sales, improving by over 10 percent over 2024's figures.

- Table 1.2 presents data on sales and use tax receipts to entities within Laramie County. Total sales and use tax receipts decreased 3.1 percent from 2023 to 2024. The overall tax receipts are the second highest recorded and were just short of 74 million dollars.

- Table 1.9 (a) shows annual Laramie County oil production and the number of active wells. Average monthly oil production in Laramie County rose from 763,777 barrels in 2023 to 911,371 barrels in 2024. Total annual oil production rose 19.3 percent from 2023 to 2024. The average monthly number of active wells rose from 520 in 2023 to 589 in 2024 (+13.3%). Table 1.9 (b) shows oil prices, which fell slightly from a monthly average of \$77.64 in 2023 to \$76.55 in 2024 (-1.4%). The number of spuds – defined as a newly drilled oil well – decreased sharply from 56 in 2023 to 6 in 2024.

Notes: <sup>1</sup> The State of Wyoming collects a 4% state sales and use tax as well as a 1% optional general purpose county sales and use tax. Table 1.2 shows the total share of collected taxes received by entities within Laramie County including Laramie County, the city of Cheyenne, the town of Burns, the town of Albin and the town of Pine Bluffs.

This total includes the 4% State Sales and Use Tax, 1% Optional General Purpose Sales and Use Tax, and the Out of State Sales and Use Tax.

From July 1, 1992 to June 30, 1993, the distribution was 35%.

On July 1, 1993, the distribution was changed to 28%.

On July 1, 2002, the percentage distribution was changed to 29.5%.

As of June 30, 2004, the percentage distribution was changed to 31%.

\* Amounts were added to reflect loss in sales taxes levied on food

\*2006- \$350,694

\*2007 - \$710,532

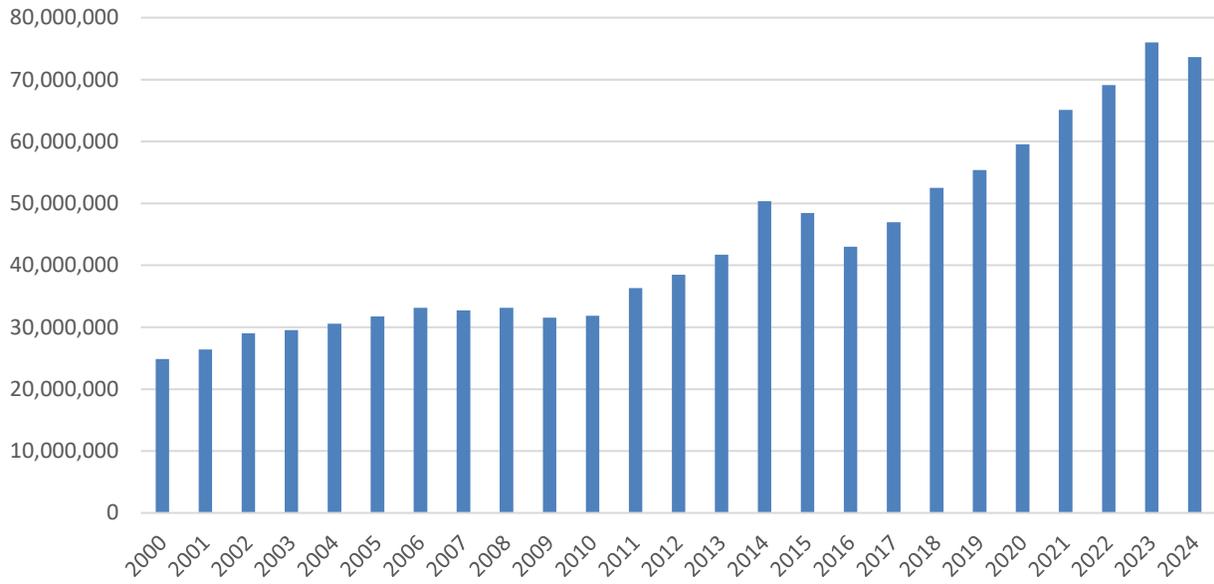

\*2008 - \$1,076,784

\*2009 - \$1,791,000

\*2010 - \$895,500

## Employment Trends

This Employment Trends section presents a comprehensive overview of past and current employment statistics and trends.

Table 2.1 presents job totals, (these totals include both full- and part-time jobs), by industrial sector. This allows for the measurement of job growth, by sector, over time. The source of these data is the Bureau of Economic Analysis (BEA) which is part of the U.S. Department of Commerce and is considered the best source of jobs data<sup>2</sup>. BEA data generally lag by at least one year, so generally the most current data for this report is from 2023.

<b>Employment Trends</b>	
<b>Tables and Figures</b>	
<b>Table 2.0</b>	<b>Labor Force Averages (2009-2024)</b>
<b>Figure 4</b>	<b>Unemployment Rate (2009-2023)</b>
<b>Table 2.1</b>	<b>BEA Employment (2009-2023)</b>
<b>Table 2.2</b>	<b>Current Employment Statistics (2004-2024)</b>
<b>Table 2.3</b>	<b>BEA Proprietors (1993-2023)</b>
<b>Table 2.4</b>	<b>Employment Projections (2021-2025)</b>
<b>Table 2.5</b>	<b>Firms by Size and Industry (2022)</b>

- The total number of jobs in Laramie County in 2022 was 81,027. That is an increase of 2,449 jobs since 2021. Updated information from the U.S. Bureau of Economic Analysis is not available for 2023.
- Employment data for the Mining sector is available for years 2013 through 2022. The mining sector added 116 jobs in 2022. The industries that added the most jobs were finance and insurance (+1,384), real estate and rental leasing (+557), and accommodation and food services (+290). Updated information from the U.S. Bureau of Economic Analysis is not available for 2023.
- Government remained the primary employer in Laramie County with a total of 17,318 jobs. This was a decrease of 215 jobs (-1.2%) from 2021 to 2022. The importance of the public sector to the Laramie County economy is clear. In 2022, government on all levels, federal, state, and local, accounted for 21.7 percent of all jobs and 36.7 percent of all income. This significant public sector presence is a source of economic stability in Laramie County. However, both federal and state government employment fell in 2022.
- Unemployment fell in Wyoming and Laramie County during 2024. The unemployment rate in the state moved from 3.1 percent in 2023 to 3.2 percent in 2024. During the same time period, unemployment in Laramie County moved from 3.1 percent in 2023 to 3.3 percent in 2024. The unemployment rate remains low and the last three years continue to show the lowest unemployment rates for Laramie County since we began tracking the statistic in 1985.

<sup>2</sup>BEA data are based on Current Employment Statistics, Quarterly Census of Employment and Wages and Internal Revenue Service data and include full- and part-time employees, civilian government employees, agricultural and household employees, estimates/adjustments for employment not covered by the state Unemployment Insurance program and the Unemployment Compensation for Federal Employees program, and estimates for employment in farms, religious organizations, railroads, military and residents employed by international organizations.

- Table 2.3 presents BEA data on the number of non-farm and farm proprietors, plus average incomes for both groups through 2022. From 2021 to 2022, the number of non-farm proprietors increased by 2,588 (+10.4%) while the number of farm proprietors decreased by 25(-2.4%). Average farm income fell from 2021 to 2022, from \$14,140 to \$9,853. It should be noted that there is substantial variation in the data. Annual averages for farm income over the past 10 years have ranged from an average loss of -\$10,072 in 2020 to a high of \$18,125 in 2014.
- Table 2.4 contains job projections from 2021 to 2025 using BEA employment data as the baseline. This table also contains actual jobs data for 2021 and 2022, which allows for a comparison between actual and projected results. For 2021, the total employment projection was 69,543. This projection was an underestimate – it projected 5,481 fewer jobs than were actually counted in that year. The 2022 projection of 75,220 total jobs was also an underestimate. The actual number of jobs was 81,027, which is 5,807 fewer jobs than projected. The estimations were off for a few reasons. First, the initial data for 2020 indicated job losses due to the pandemic, which were included for 2021 and 2022 projections, pushing the estimations down. Second, there was a bubble created in the housing market, leading to much higher than expected employment in FIRE (Finance, Insurance, and Real Estate).
- In Table 2.4, the projections for 2023 and 2024 have been revised, and projections for 2025 have been added. Projections are made by extrapolating past trends into the future. Given the current instability/volatility in the Wyoming economy and the national economic issue of inflation and rising interest rates, these forecasts should be viewed with caution.
- Table 2.5 shows the distribution of employers in Laramie County by the number of employees. These data are published by the U.S. Census Bureau as part of the County Business Patterns, a program designed to provide statistics for businesses with paid employees. While data are generally available 18 months after each reference year, the most current available data for Laramie County are 2022. The vast majority of employers in Laramie County are small businesses. In 2022, more than three-fourths of businesses with paid employees had fewer than 10 employees. More than half (62%) employed fewer than five employees and 16.6 percent employed five to nine employees. Less than one percent of businesses with paid employees employed more than 100 workers.

Notes: <sup>1</sup>Figures are not benchmarked. Benchmarking is completed on an annual basis to account for survey error, or variance, in the estimates including sampling error and nonsampling error. Benchmarking data determine final employment levels. Figures for 2002-2015 are benchmarked.

<sup>2</sup> Labor statistics are compiled from two major sources: Current Population Survey (CPS) and Current Employment Statistics (CES). Local Area Unemployment Statistics (LAUS) are estimated based on CPS data which is collected through household surveys where individuals are reported as employed, unemployed or not in the labor force. These data include employment for both agriculture and nonagricultural industries. CES data are based on establishment records compiled through monthly surveys of nonfarm employers. Individuals who worked in more than one establishment, full or part-time, are counted each time their names appear on payrolls.

Because of changes in the estimation methodology, there is a break in the data set between 2009 and 2010. Therefore, pre-2010 data are not comparable to data from 2010 to present.

## Wages, Earnings & Income Trends

The Wages, Earnings and Income Trends section presents data series on average wages, earnings, and personal income for residents of Laramie County. The most recent income data available are for 2023. The U.S. Census Bureau provides various income measures using the American Community Survey (ACS). The ACS provides 1-year and 5-year estimates. The 1-year estimate is available for geographic areas with 65,000+ people. The 5-year estimates are available for the 1-year areas and those with less than 65,000 people. The 5-year estimates, while not as timely, are based on 5 times as many sample cases as 1-year estimates.<sup>3</sup>

The key thing to note about the 1-year and 5-year estimates is that they should NOT be compared with each other. Comparisons may be made from 1-year estimate to 1-year estimate and from 5-year estimate to 5-year estimate (as long as they are not overlapping). However, accurate comparisons cannot be made between the data series. For example, it is not statistically appropriate to compare 1-year estimates to 5-year estimates.

- Income figures will vary depending upon which estimate is used. The ACS income estimates are published at the 90 percent confidence level; the end result is that reported income measures can vary widely from year-to-year in both absolute size and in the rates of change. **Please use extreme caution when drawing definitive conclusions about income measures.** The footnotes in Table 3.0 identify which of the estimates are being used.
- Table 3.0 (a) presents ACS 5-year estimates of household income in Laramie County. In 2023, the median household income was \$77,884 and average (mean) household income was \$99,326. The mean is the arithmetic average of a set of numbers. The mean is particularly sensitive to outliers – numbers that are significantly larger or smaller than the rest of the numbers in the set. In this case, Laramie County’s mean income is much higher than the median income because of the effect of high-income households.
- Table 3.0(c) shows Earnings by Gender. Median earnings for males in 2023 were \$63,603 and \$48,869 for females. Male median earnings were 30.1 percent higher than female median earnings. Mean earnings for males were \$74,725 and mean earnings for females were \$57,344. Male mean (average) earnings were 30.3 percent higher than female mean earnings. This large wage gap in

Figure 7	Percentage Change in Personal Income (2003-2023)
Table 3.4	Total Payroll (2013-2023)

<sup>3</sup> ACS 3-year estimates have been discontinued. The last period for which these estimates were available was 2011-2013. Past 3-year estimates will remain available, but no new 3-year estimates will be produced.

Laramie County is consistent with the State of Wyoming's persistent wage gap. In 2023, Wyoming had the third largest wage gap among the 50 states and Washington D.C., trailing only Utah and Idaho. A woman in Wyoming made 64 cents for every dollar a man made. <sup>4</sup>In Utah, women made just 61 cents for every dollar a man made. In Washington D.C. and Vermont, the areas with the smallest disparities, women made 83 cents for every dollar a man made.

- Figure 7 shows the percentage changes in growth in annual personal income for the United States, the State of Wyoming, and Laramie County. Fluctuations in Laramie County's personal income closely mirror both national and state income changes most years. The magnitude of changes in both state and local personal income is greater than those on a national level in some years. This difference is a function of the State of Wyoming's dependence on the volatile mineral industry. Comparing the fluctuations in personal income at the state level and in Laramie County shows annual changes are greater at the state level relative to the county, providing evidence that Laramie County's economy is more stable than that of the state.
- Table 3.1 presents data on Average Annual Earned Income by sector in Laramie County in 2023. Average annual earned income across all sectors rose from \$55,627 to \$58,721 (+5.6%) from 2022 to 2023. The three sectors with the highest average annual earned incomes were Mining (\$111,108), Management of Companies and Enterprises (\$110,553), and Utilities (\$101,707). The three sectors with the highest growth in wages were Professional, scientific and technical services (+14.9%), Mining (+14.8%), and Manufacturing (+10.9%).
- Despite rising in 2023, per capita personal income in Laramie County continued lagging behind the national average. In 2023, per capita personal income in the county was \$65,150 and the national per capita income was \$69,810. 2023 marks the eighth year in a row that Laramie County per capita income has lagged behind the national average. At the state level, per capita personal income is higher than the national average. Per capita income in 2023 for the state of Wyoming was \$82,060, 17.5 percent higher than the national average. These data are shown in Table 3.2.

# Demographic Trends

The Demographic Trends section presents population data and population forecasts for both Cheyenne and Laramie County. Table 4.0 presents population details for Census Designated Places as of the 2020 Decennial Census.

- Table 4.1 provides population estimates and projections using US Census data
- Table 4.2 (a) contains data on the age distribution of Laramie County residents. The median age of Laramie County residents was 38.5 in 2023, up from 38.1 in 2022.
- The population 65 years of age and older continued to increase, from 17,505 in 2022 to 17,994 in 2023 (+2.8%). The 55 to 64 years age cohort decreased, from 12,576 to 12,436 (-2.4%). These two cohorts together accounted for 30.1 percent of the population, evidence of the continued aging of Laramie County’s population.
- The number of workers in the prime working age cohort (25 to 44 years) increased from 27,980 in 2022 to 28,123 in 2023, an increase of 0.5 percent.
- Table 4.4 contains migration statistics for Laramie County from 2002 through 2021. For the second time in the last four years, out-migration has exceeded in-migration. In 2020, the net number of migrants, (in-migrants minus out-migrants), was 79. In 2021, the net number was -10. These are the two most balanced years in the last 20 in terms of migration. Normally, we see a net migration of 543 in-migrant minus out-migrants. Recent migration information is not available.
- Table 4.5 presents data on the inflow and outflow of earnings and the net resident adjustment between the two. The inflow of earnings is the amount of money brought back into the county’s economy by Laramie County residents who commute to work outside of the county. The outflow of earnings represents workers who commute into the county for work but live outside of the county and take their earnings back to their county of residence. In 2023, \$138,220,000 flowed into the county and \$365,380,000 flowed out of the county, resulting in a net outflow of \$227,160,000. The pattern has been consistent over time – net outflows have been larger than inflows. This means more dollars left the local economy than were returned by Laramie County residents working outside Laramie County. While these may look like large numbers, the net outflow of \$227,160,000 represents only 3.5 percent of total personal income in Laramie County.

Figure 9	Commuting Flows (1996-2023)
Figure 10	Net Commuting Residential Adjustment (1996-2023)
Table 4.5	Commuter Income Flows (1996-2023)
Table 4.6	Education Profiles & ACT Scores
Table 4.7	School Enrollments (1997-2024)
Figure 11	School Enrollments (1997-2024)

- Table 4.6 presents data on the level of education attained by Laramie County residents. In 2023, 95.3 percent of the adult population had graduated from high school and 33.4 percent had a bachelor's degree or higher. There is moderate variation in these estimates from one year to the next which makes year-to-year comparisons problematic. Statewide, 93.9 percent of the adult population had graduated from high school and 30.4 had obtained a bachelor's degree or higher. Nationally, 89.8 percent of adults had graduated from high school while 36.2 percent had obtained a bachelor's degree or higher.<sup>5</sup>
- Table 4.7 contains data on public and private school enrollments within Laramie County. Total public school enrollment (LCSD1 and LSCD2) decreased, from 14,409 in 2023 to 14,256 (-1.06%) in 2024. From 2023 to 2024, all levels of public schooling, only senior high school saw an increase in enrollment and even that was small.
- Table 4.7 also presents Laramie County Community College (LCCC) enrollments. Enrollments at LCCC had been pushed down due to the coronavirus pandemic and student preference for in-person learning. In 2024, LCCC continued seeing a bounce back in enrollment. The headcount of students learning in Laramie County is up 5.8 percent from last year while the FTE# is about the same as 2023. I expect those numbers to continue to improve.
- Home-schooled enrollments increased in 2023. In recent years there has been general growth in home school and private education which are seeing additional options and programs to facilitate non-public education. Home-schooled enrollment increased from 434 in 2023 to 528 in 2024 (+21.6%), which is a large percentage increase but still a relatively small number when compared to public school enrollment.

## Housing Trends

The Housing Trends section contains data compiled from various sources that may be useful in assessing the local housing market.

- Table 5.0 presents data obtained from the Cheyenne Board of Realtors. From 2023 to 2024, the average monthly number of residential units available for sale decreased from 189 to 186 (-1.6%) in the city of Cheyenne and fell from 126 to 87 (-30.9%) in the county.
- The total number of units – city and county -- sold increased from 1,264 in 2023 to 1,400 in 2024 (+10.8%). In the city, the average selling price rose from \$372,305 to \$380,513 (+2.2%) and in the county, the average selling price increased substantively from \$575,456 to \$603,382 (+4.9)
- Table 5.4 presents data on building permits issued in the city of Cheyenne and Laramie County. In the city, the number of building permits for new single-family homes increased sharply from 67 in 2023 to 156 in 2024 (+132%) and new apartments/duplexes fell from 73 in 2023 to 32 in 2024. In total, these permits added 188 units. In the county, outside the city of Cheyenne, the number of single-family building permits rose significantly, from 85 in 2023 to 157 in 2024 (+84.7%).
- Housing rental rates in Cheyenne are presented in Table 5.1. Rental rates for single-family homes increased from \$1,653 to \$1,658 (+0.3%) from second quarter 2023 to second quarter 2024. Rental rates for apartments increased from \$1,113 in the second quarter of 2023 to \$1,187 in the second quarter of 2024 (+6.6%).
- Table 5.7 presents apartment vacancy rates in Laramie County. Vacancy rates at large apartment complexes rose from 1.9 percent in the fourth quarter of 2023 to 2.1 percent in the fourth quarter of 2024.

Notes: <sup>1</sup>As of January 2006, Cheyenne Board of Realtors (CBR) changed the calculation of the days on the market to the number of days from the day listed to the day under contract. Prior to 2006, days on the market was calculated from day listed to the day of closing.

<sup>2</sup>CBR began reporting average days on the market separately for city and rural areas.

Notes: <sup>1</sup>The five year average is a moving average. For example, the five year average of 232 in 2015 represents the mean number of Housing Permits issued from 2011 through 2015.

<sup>2</sup>Housing units are defined as New Residences, Townhouses, Condominiums, Multi-plexes and Apartment units.

1983 - 1988: Reported Apartment permits were not extended into units.

1989 - 1991: No new apartments or multi-plexed units were built.

# Development Trends

The Development Trends section presents data on commercial and industrial development in Cheyenne and Laramie County.

- In 2024, the city of Cheyenne annexed almost 1,900 acres, which increased the size of the city by 8.0 percent.
- Table 6.1 contains detailed information on the level of commercial construction within the city borders. The total number of permits increased from 118 in 2023 to 161 in 2024 (+36.4%). The total valuation of all permits rose by 1032.3 percent. The large increase in permit values is due in large part to data center additions being added in 2024.
- The value of new industrial/commercial construction rose in the city as well as in the county in 2024. Total new dollar valuation was \$1.6 billion in the city and \$90.9 million in the county. See Table 6.2 for details.

<b>Development Trends</b>

<b>Table 6.5</b>	<b>Major Property Tax Districts (2014-2024)</b>
<b>Figure 15</b>	<b>Major Property Tax Districts - Revenues (2014-2024)</b>

- Vacancy statistics for commercial properties are presented in Table 6.3. This table presents quarterly data through the fourth quarter of 2024. The number of available office spaces decreased by 14 from 31 in the fourth quarter of 2023 to 17 in the fourth quarter of 2024, while the average rent for office spaces rose by nearly \$1.24 per square foot.
- The number of vacant warehouse properties decreased by 7 over the year, moving from 24 in the fourth quarter of 2023 to 17 in the fourth quarter of 2024. In a bit of a surprise, the total available square footage of warehouse space increased by over 100,000 sf in 2024. Rents increased by nearly 90 cents per square foot over the past year.
- The number of available retail properties decreased from 42 in the fourth quarter of 2023 to 27 in the fourth quarter of 2024. There are around ten empty storefronts in the Frontier Mall. Rents have increased by around 65 cents per square foot over the last year.
- Data on the assessed value of real and personal property are found in Table 6.4. Combined, property valuation for the city of Cheyenne and Laramie County was \$2.79 billion, a decrease of 2.9 percent over 2023. Total city valuation was \$1.04 billion dollars in 2024, a decrease of 1.7 percent over 2023 and total county valuation was \$1.75 billion dollars in 2024, a decrease of 3.5 percent from 2023.

- Table 6.5 presents property tax revenues generated for various local governmental entities. The city of Cheyenne’s property tax revenues rose 1.7 percent from 2023 to 2024. This provided the city with additional revenue of \$146,907. Laramie County’s property tax revenues decreased by 9.7 percent over the same time period, which resulted in a decrease of \$5,305,785 in tax revenue. The county revenue reduction is due in large part to a reduction in the mill levy from 19.04 mills in 2023 to 17.71 mills in 2024.

## Economic Development

- Laramie County’s economic development organization, Cheyenne LEADS, reported that it has 31 active projects early on in 2025. The primary prospect areas are data centers, manufacturing and firearms/ammunition but they are also working hard on programs focused on business retention and expansion.
